

Reduce your carbon footprint  
with GamesForest.Club

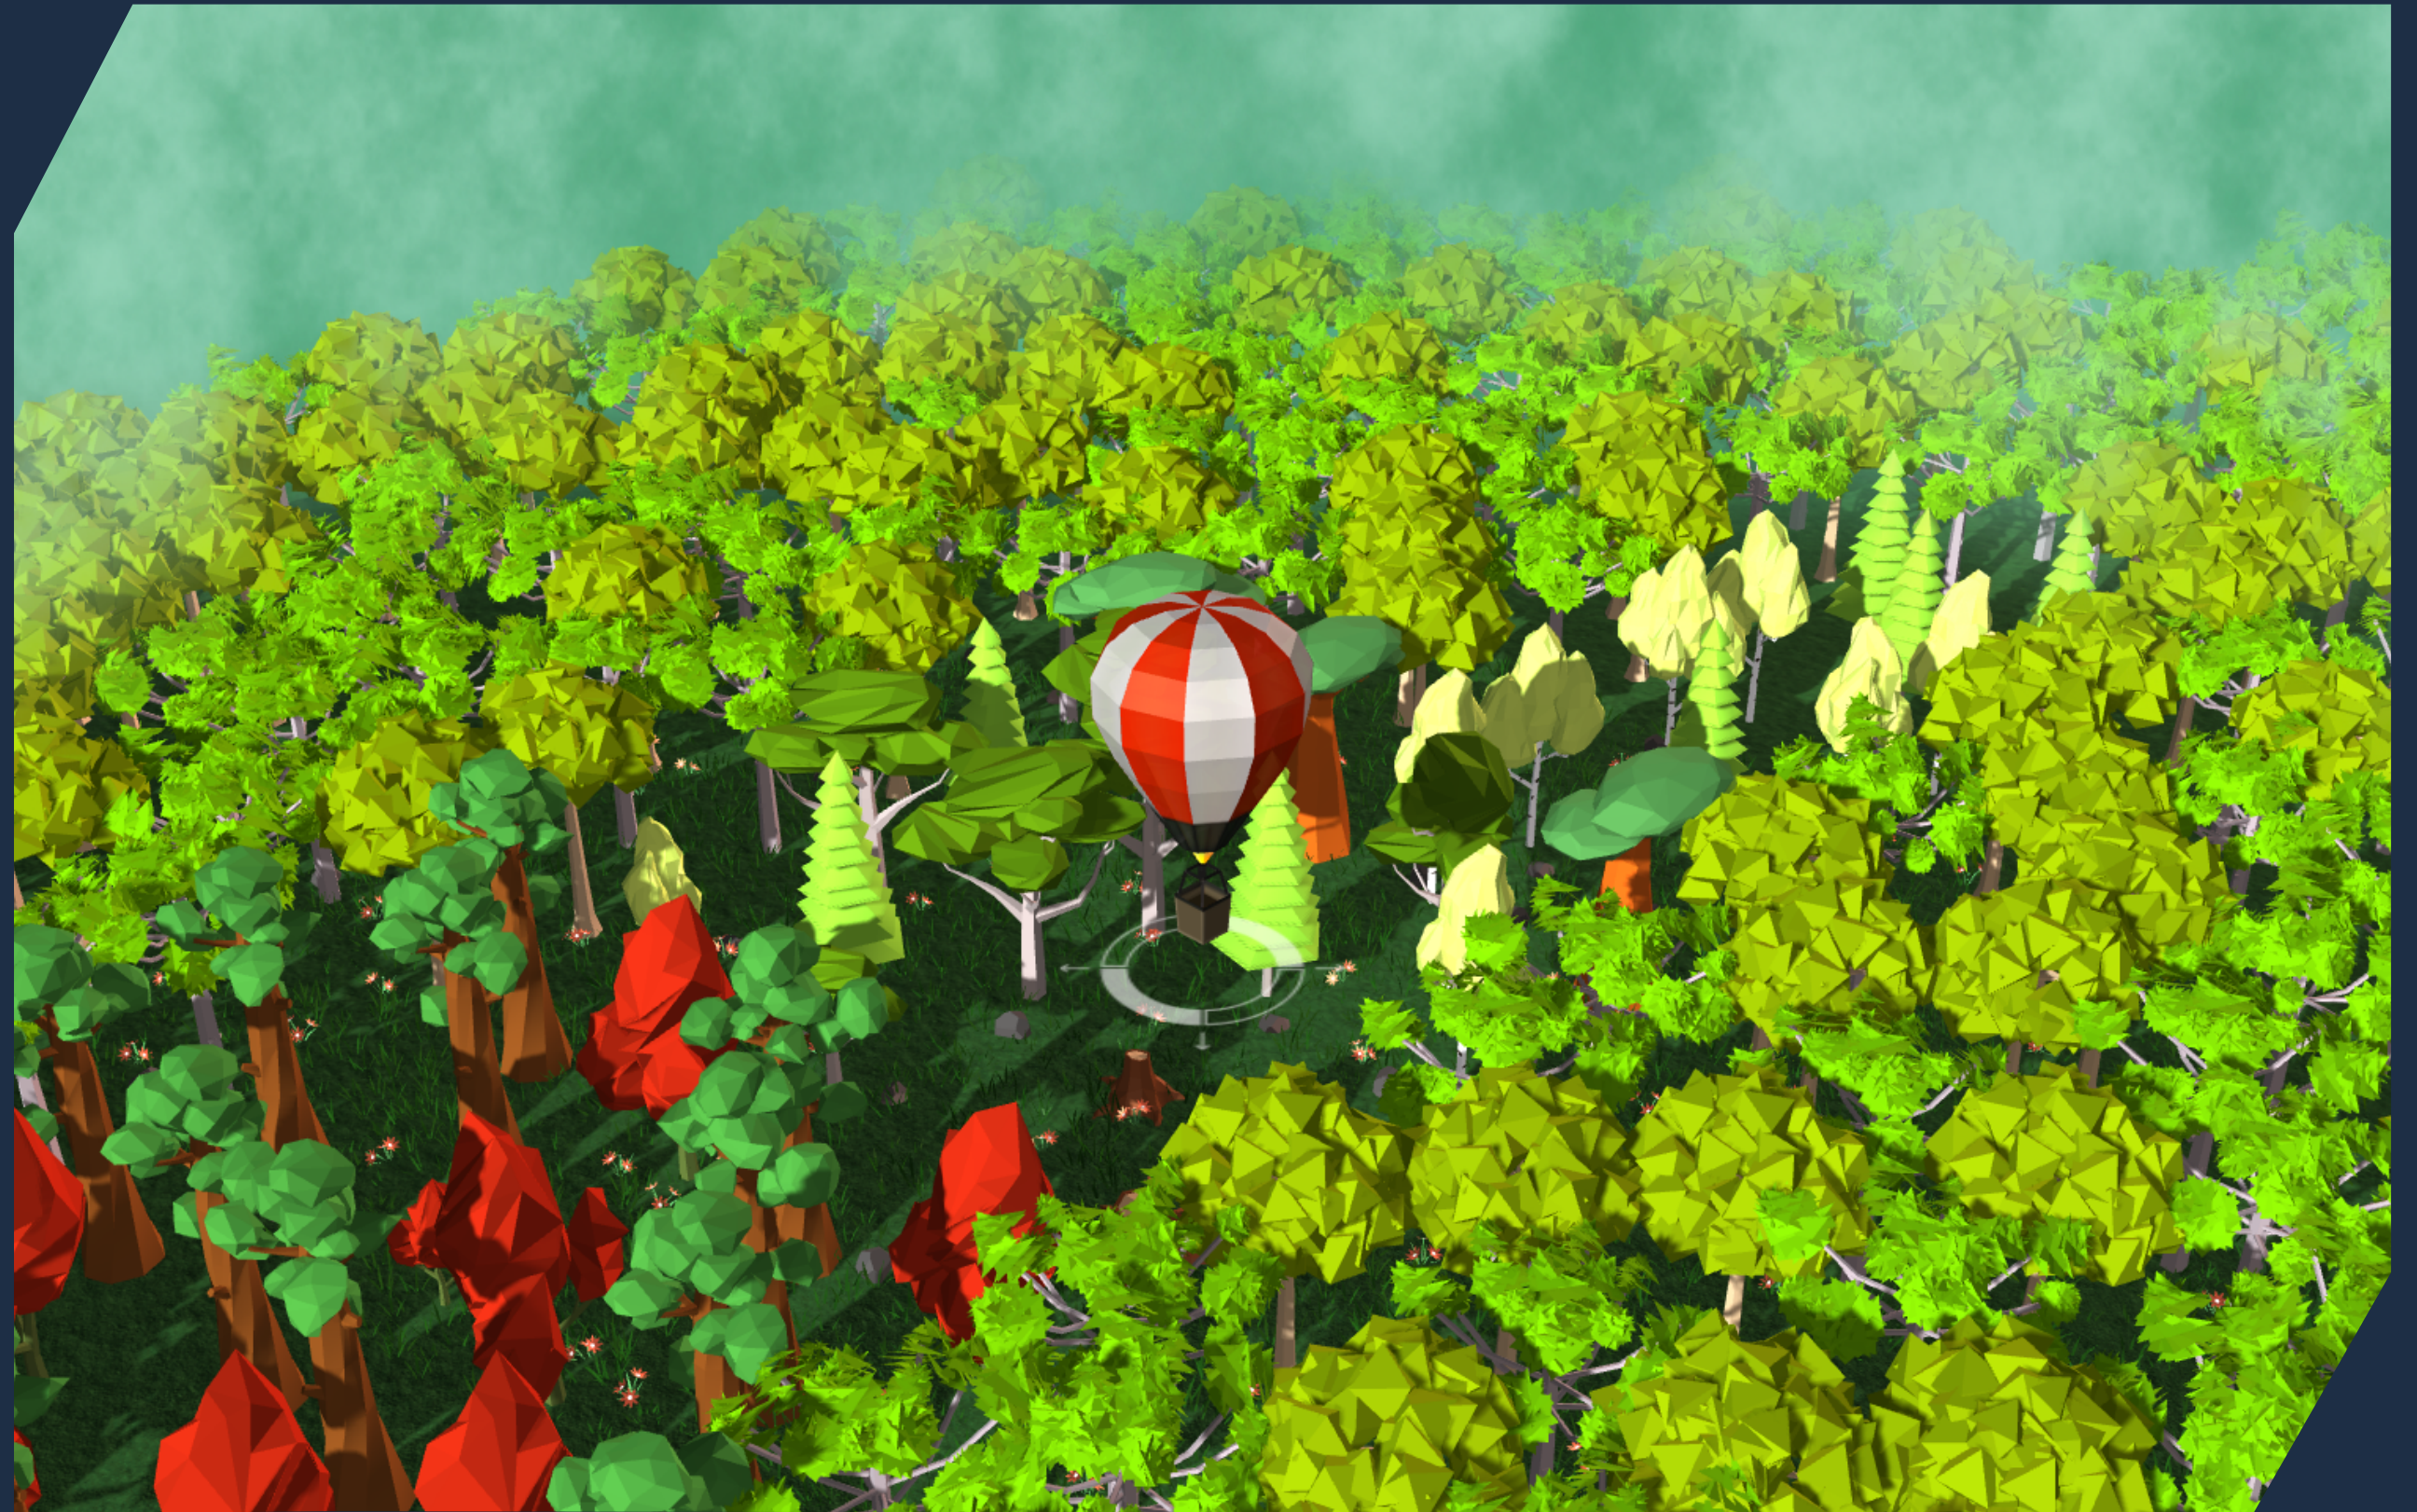

# About GamesForest.Club

We are a non-profit organization guiding the **games industry** to a **climate positive future** by 2030.

With data driven and transparent **reforestation and forest conservation**, we reduce your and your players' ecological footprint, regenerating climate and biodiversity.

Our solutions make regeneration **profitable** while **taking your brand on a regenerative hero's journey**.

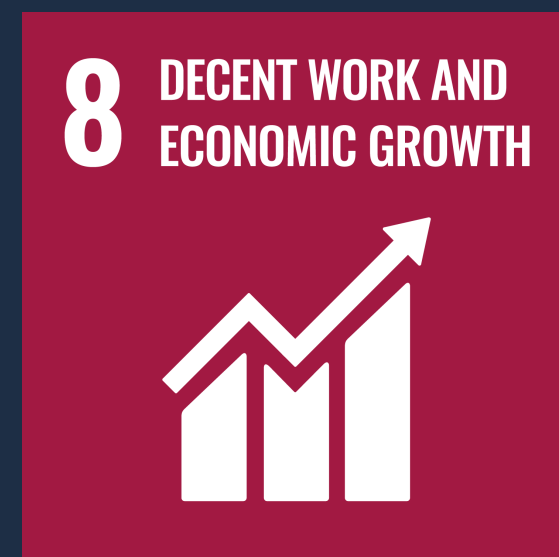

# How we work

## We source our projects according to very high ecological and social standards

The projects we support ensure carbon absorption while also embedding multiple aspects of ecosystem integrity and benefits for the local community.

By reducing carbon footprint with GamesForest.Club, you are also supporting the following Sustainable Development Goals:

We visualize your engagement in the digital GamesForest twin and celebrate your achievements with your community and GamesForest network.

We reduce your administrative costs by building close and trustworthy relationships with the people doing restoration work on the ground.

You get the best carbon credit prices, while we ensure transparent handling of all transactions: from your company's account all the way to the intervention taking place on the land.

We make sure that your money is translated to the maximum climate benefits, advancing your company's effort towards the Sustainable Development Goals.

# Our carbon project in Indonesia

The Gula Gula Food Forest Project is led by an indigenous, matriarchally structured community in West Sumatra.

Degraded land is converted into productive food forests that capture and store carbon.

The local community is trained in assisted natural regeneration techniques and in building regenerative forest enterprise cooperatives.

Community incomes are not only supported through the trading of sustainably sourced food forest products, but also through profit-sharing of carbon credit sales.

## Prices

Reduce 0 - 2,000 tonnes of CO<sub>2</sub>: €23,00/t  
Reduce 2,000 - 5,000 tonnes of CO<sub>2</sub>: €20,70/t  
Reduce > 5,000 tonnes of CO<sub>2</sub>: €18,40/t

## Reduce your carbon footprint with GamesForest.Club

### Easy, environmentally friendly & trustworthy

1. Check out our handpicked high standard carbon forest projects and choose where and how many credits you want to purchase. If you don't know your carbon footprint yet, we will help you to measure it.
2. We retire the carbon credits on your behalf to minimize administrative costs and provide you with the official certificates.
3. Get your own digital forest page on [www.gamesforest.club](http://www.gamesforest.club) and see your digital forest grow.  
1 digital tree = 100€ investment
4. Receive a unique GamesForest Restoration Badge.  
If you reduce your entire carbon footprint, you get the badge for compensation.
5. Celebrate your engagement with your employees, clients, and community by getting promoted on social media and in the GamesForest's blog.
